

# CARBO - KIT

**First class paint kit well-suited for repair and maintenance jobs, specially designed for manual application.**

**KIT DETAILS:** CARBO-KIT is a repair and maintenance kit specifically designed for manual application with paint brush and paint roller where optimal pre-treatment and painting using high pressure is complicated or impossible to achieve.

The combination of CARBO-KIT's innovative usability, easy use and functionality makes the product kit unique and manages demanding conditions, substrates and environments.

CARBO-KIT is developed and customized for customers as a qualitative, efficient and cost-effective solution.

## APPLICATIONS

BRIDGES  
OFFSHORE - PLATFORMS  
REFINERY  
GAS PLANT  
MARINE - SHIPPING  
POWER PLANT  
BUILDINGS

## FEATURES

- › Optimized for maintenance using brush and roller
- › Easy open lid
- › Lower VOC
- › Less waste
- › Easy stirring and mixing
- › Pre-dosed in correct mixing ratio
- › Mix directly in pail
- › Both pails can be used
- › Builds higher DFT by applying with brush and roller
- › Available in several topcoats and Rapid Tint System (all colours)
- › Optimized to withstand rough surfaces
- › NORSOK M-501 pre-qualified system
- › Unaltered drying and curing times

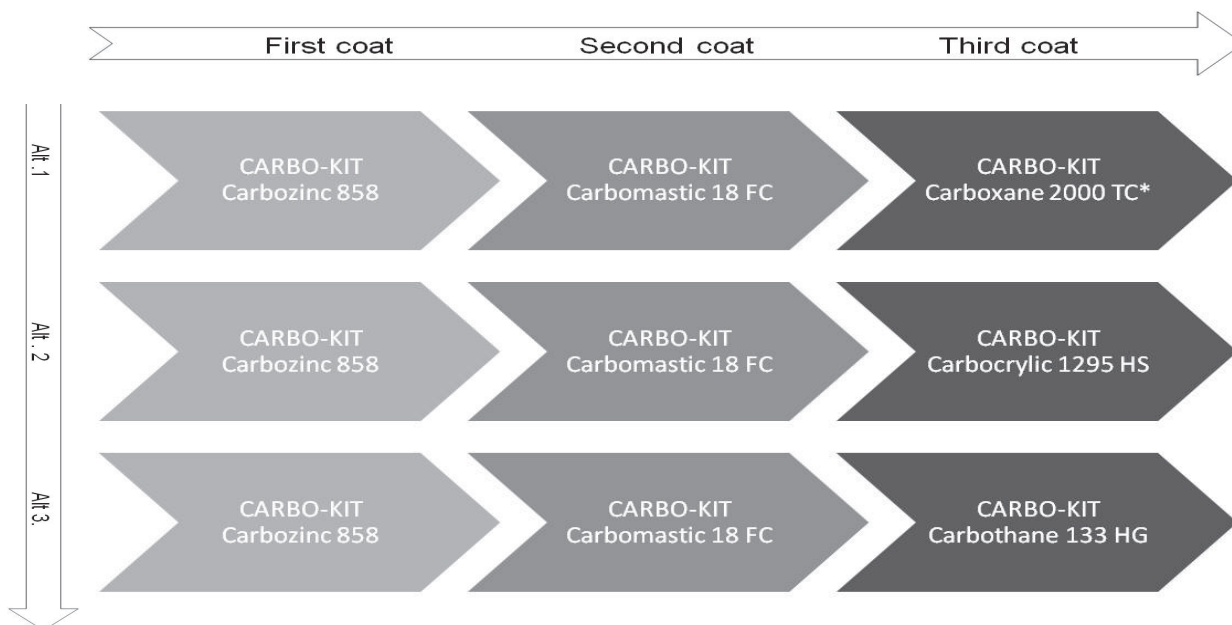

# CARBO - KIT

## Reason to Use CARBO - KIT:

OPERATION EFFECTIVE:	COST-EFFECTIVE:	METHOD:
Easier execution and handling	Reduced requirements for pretreatment	User friendly package and amount
Adjusted amount for use	Fewer number of coats	Specially developed for applying with brush and roller
Achieve specified DFT in one coat	Both pails can be used	Improved quality by manual application
No induction time (Mix'n Go)	Less waste	Usable with most types of brush and roller

## What CARBO - KIT consists of :

\* "Alt. 1 is compatible with TR0042"

"CARBO-KIT Carbozinc 858 can be replaced with CARBO-KIT Carbomastic 18 FC if shorter lifetime is required."

"CARBO-KIT Carbozinc 858 is delivered in 1.75 litres, while the remaining CARBO-KIT products are delivered in 3 litres."
